

Environmental Management Policy

HS Hyosung Advanced Materials Corporation pursues sustainable growth by systematically managing environmental impacts across all business activities based on our environmental management system.

Also, all global sites operate an environment & safety management system to prevent and reduce environmental impacts that may arise during business activities.

1. Based on HS Hyosung Advanced Materials Corporation's environmental management strategy, we strengthen our response to climate change and build the foundation for environmental management.
2. In order to minimize impact on the environment and our stakeholders, we establish and implement an environmental management system through which we achieve environmental protection and pollution prevention, and pursue eco-friendly process design and product development.
3. We monitor environmental impact factors such as hazardous substances, wastes, wastewater, and GHGs arising from business activities, and contribute to the protection of water resources, air, and biodiversity through preemptive reduction activities.
4. We strictly comply with applicable laws, regulations, and agreements, and pursue reduction in the use of all resources and energy, including water and minerals, to prevent resource and energy depletion and minimize environmental impacts across the life cycle of our business activities.
5. To effectively implement environmental management, we provide continuous education and training and share environmental management values with all stakeholders, including employees, suppliers, and customers. We also work with our suppliers to share environmental responsibility across the supply chain and reduce environmental impacts.
