

Biodiversity Policy

HS Hyosung Advanced Materials Corporation recognizes biodiversity conservation as an important global environmental issue as well as part of our climate change response activities. We will strive to preserve biodiversity and realize sustainable use of resources. All employees will be aware of, and faithfully comply with the biodiversity policy and contribute to the improvement of the quality of life of our stakeholders.

1. Embedding biodiversity into business

- Consider biodiversity impacts in business operations and decision-making, and ensure that biodiversity management is reflected across all business activities through awareness raising and expanded engagement.

2. Biodiversity risk & opportunity management

- Identify and assess biodiversity-related risks and opportunities that may arise in business activities and the value chain, and pursue reduction of negative impacts and strengthened management.

3. Biodiversity conservation and promotion

- Consider impacts on ecosystems and biodiversity across all business activities and the life cycle of our products, and pursue measures that contribute to their conservation and enhancement.

4. Sustainable use of resources

- Consider the impacts of natural resource use and business activities on ecosystems, and pursue sustainable resource use and efforts to reduce environmental impacts.

5. Strengthening stakeholder engagement

- Participate in initiatives and collaborative activities related to biodiversity conservation and enhancement, and expand cooperation with diverse stakeholders.

6. Information disclosure and communication

- Transparently disclose key biodiversity-related information and management status based on facts, and enhance trust with stakeholders.
