QUALITY POLICY

Our quality goal is to go beyond providing optimal quality products that meet customer needs to solutions that enhance customer value. All employees must be fully aware that the solutions we provide directly influence the safety and comfort of users, and improve our customer value. All employees, therefore, shall strive to improve quality in all business sectors upon quality management system.

01) We are committed to full compliance with quality regulations and standards

Become a trusted supplier through world-class management and work methods achieved by thorough adherence to basics and principles.

02) We are committed to continuous quality innovation and product development

Become a market leader by providing solutions that fundamentally solve customer issues and timely response to changing customer quality requirements.

03) We are committed to continuous improvement of our quality competitiveness

Become a partner that realizes customer satisfaction by fostering capabilities to define and implement quality through continuous education, and global technology exchanges.
